

[VideoProc 3.5 \(20200120\) MacOS](#)

The image shows the Smart Converter Pro application window on a Mac. The window title is "Smart Converter Pro". It displays a list of three video files for conversion:

Video Title	Duration	Conversion Speed	Status
Top of the Lake S01 E01	49 minutes	Fastest	Success
Elementary S01 E01	45 minutes	Fastest	59%
The Walking Dead S03 E16	42 minutes	Fastest	Sending

Below the list is a row of output format buttons: Apple TV, Quicktime, iPad, iPhone or iPod, iPad Mini, Music, and More. At the bottom, there is a "Set Destination" button with a download icon, a "Convert for Apple TV" label, and a "Convert" button.

Handwritten annotations in yellow and white text provide feedback on the interface:

- "batch conversions add files till your hearts content" points to the list of files.
- "clever spinning icons show exactly what's happening" points to the progress indicators for the second and third files.
- "awesome twirling thing when sending to iTunes" points to the "Sending" status of the third file.
- "custom buttons you choose which output formats appear here" points to the row of output format buttons.
- "go crazy and choose a new folder for your files" points to the "Set Destination" button.
